

## **ASTM International Fastener Committee Gives Top Annual Award to Quentin Smith**

International's Committee on Fasteners (F16) has presented its top annual award – the Award of Merit – to Quentin Smith of Faurecia in Auburn Hills, MI, U.S.A. The prestigious award, which includes the accompanying title of fellow, is ASTM's highest recognition for individual contributions to developing standards.

The committee honored Smith for his dedicated work to develop standards in a number of areas, including bolting technology, corrosion of metals, and fasteners. He has been a member of ASTM since 1980.

Smith is a fastener engineer with Faurecia, designing automotive hardware. He previously served as a metallurgical engineer with Lockheed Space Operations, a senior fastener engineer with Dana Corporation, and a corrosion Engineer for the Oregon Department of Transportation.

In addition to ASTM, Smith is a member of the American Society of Mechanical Engineers, the American Society for Metals, and the National Association of Corrosion Engineers.

### **Helping our world work better**

*Over 12,000 ASTM standards operate globally. Defined and set by us, they improve the lives of millions every day. Combined with our innovative business services, they enhance performance and help everyone have confidence in the things they buy and use – from the toy in a child's hand to the aircraft overhead.*

*Working across borders, disciplines, and industries we harness the expertise of over 30,000 members to create consensus and improve performance in manufacturing and materials, products and processes, systems and services. Understanding commercial needs and consumer priorities, we touch every part of everyday life: helping our world work better.*
