

All-Pro Threaded Offers API 20E and 20F BSL-1, BSL-2, and BSL-3 Bolting Licenses Arlington, TX, November, 2018

All-Pro Threaded Products, Inc. (ATP) has achieved another milestone in its quality assurance programs, having received licensing to manufacture API 20F BSL-1, BSL-2, and BSL-3 monogram bolting. This new API 20F licensing is in addition to the company's existing API 20E BSL-1, BSL-2, and BSL-3 monogram license.

All-Pro Threaded Products recognizes API Q1 as the international standard all petroleum-related companies are expected to meet. In 2016, ATP received the official API Q1 registration, later obtaining both the API 20E and 20F monogram licenses.

Expanding capabilities to BSL-1, BSL-2, and BSL-3 bolting for API 20E and 20F is another step in All-Pro Threaded's commitment to excellence. "These additional licenses give customers confidence that our fasteners are manufactured to the highest level of quality," Todd Grzych, All-Pro Fasteners Marketing and Communications Director, said. "This is the same reason All-Pro Threaded conducts all testing and manufacturing in house at our Arlington, TX, ISO 17025-accredited mechanical laboratory and manufacturing facility."

The American Petroleum Institute confirmed All-Pro Threaded has met all applicable requirements and has developed and consistently used the procedures that address all elements within their expectations. Through this confirmation and registrations, including ISO 9001 and ISO 17025, All-Pro Threaded is proud to be leading the way in quality assurance within the fastener industry.

About All-Pro Threaded Products

All-Pro Threaded Products has been setting the standard for fastener manufacturing quality since 1982. ATP has been dedicated to manufacturing the highest quality products and providing exemplary customer service for 35 years. Industries serviced include: Oil/Gas, Tower/Pole, OEM/MRO, Structural Steel, Wind Power, Metal Building, and more. ATP can manufacture products to meet any application requirement.

To maintain the highest quality standards, all manufacturing processes and testing are completed in the U.S.A. at the ATP facility in Arlington, TX.

All-Pro Threaded Products is an All-Pro Fasteners company.
