

AllState Fastener Corporation Receives General Motors Supplier of the Year Overdrive Award

All State Fastener Corporation (ASF) is proud to announce we are the recipient of the General Motors Supplier of the Year Overdrive Award. General Motors' 29th Annual Supplier of the Year Awards were given out to 122 suppliers from 16 different countries.

GM recognized 26 suppliers from eight different countries with the Overdrive Award, which are given to those suppliers who excelled in GM's Global Purchasing and Supply Chain key priorities, including safety, total enterprise cost and profitability, launch excellence, sustainable value streams, accelerating innovation, and nurturing relationships.

ASF's dedicated team members in Metro Detroit helped make this award a reality.

"It is an honor to receive one of only 26 highly coveted Overdrive Awards, recognizing outstanding achievement and performance," said Executive Vice President Nick Giorgio. "The collaboration with GM allowed All State Fastener to achieve accomplishments beyond GM's expectations. ASF would like to extend our sincere thanks to our supply chain partners and our GM counterparts for the teamwork and dedication that made this possible."

Operating for more than 57 years, All State Fastener Corporation is a global leader in the fastener industry, producing parts for Original Equipment Manufacturers (OEMs) and Tier Suppliers in the automotive, heavy truck, transportation, heavy equipment, electronics, appliance, on/off road mining and construction equipment and leisure sports equipment manufacturing. The company supports both production and MRO fastener requirements and holds ISO 9001:2015, Ford Q1 and C-TPAT certifications, along with industry-leading quality and performance awards. The company is family owned and stands out for its customer service, expert technical staff, proven quality systems, broad product range and streamlined automated delivery systems.

Three key elements make up the ASF formula that defines their success. Depth of fastener experience, cross functional supply chain experience, and global sourcing experience.

Over the last five decades, ASF has developed a laser-focused world class supply chain, expert technical staff, proven quality systems, and automated VMI fulfillment systems. ASF's global footprint and willingness to adapt to customer driven requirements separates them from their competition.
