

Boker's 2015 Stamping Brochure is Now Available

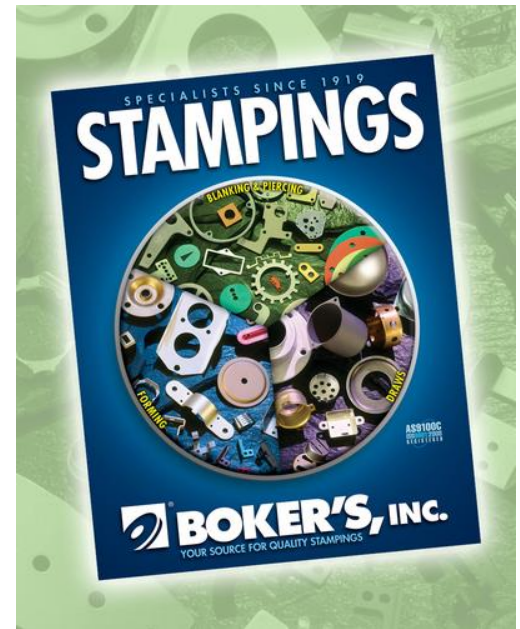

Minneapolis, MN—July 21, 2015—Boker's announces its 2015 Stamping Brochure is now available. Serving as a valuable industry resource, the brochure provides a comprehensive overview of the company's stamping capabilities. With 95 years of experience in precision metal stamping production, Boker's satisfies complex, intricate stamping applications.

The brochure highlights Boker's extensive custom stamping capabilities with flat blanking and piercings in a complete range of sizes up to 12 inches x 12 inches, metal forming in thicknesses from 0.005 inches to 0.134 inches and draws up to 3 inches deep and 8 inches in diameter. To meet user's exact specifications, Boker's offers 2,000 commonly specified and hard-to-find material options and secondary machining operations including deburring, tapping, reaming, counterboring, spotfacing and more.

Designed as a quick-reference tool, the Stamping Brochure contains a glossary of more than 100 common terms and a base element index as well as a gauge decimal equivalents chart. It also features Boker's special programs to enhance product quality and customer convenience, including Statistical Process Control (S.P.C.), which verifies manufacturing process and accuracy. The brochure also details Boker's Dock-to-Stock and Just-in-Time programs that accommodate flexible and diverse delivery requirements.
