

Eurolink, your supply-chain problem solver, is proud to announce that we have become the very first distributor world-wide, to add a full-line of **DIN 961 Fine-Thread, Full-Thread A2 Stainless Steel Hex Head Cap Screws**. We are now stocking diameters M8-1.0, M10-1.25, M12-1.5, and M16-1.5 in lengths raging from 16mm up to 100mm all in A2 Stainless Steel.

Finally these screws no longer have to be manufactured per order. So not only does the customer no longer have to wait for the manufactured delivery, they no longer have to pay manufacturing type pricing. These screws are now in stock, ready-to-ship today, at production pricing.

You can reach us by phone toll-free at 866-787-7594, fax at 864-801-3606, or email at [sales@eurolinkfss.com](mailto:sales@eurolinkfss.com).

At Eurolink, we want to support your success by helping you solve your toughest metric fastener supply issues, so that you can get on with your business.

Hard to Find Metric Fasteners... DELIVERED!

Thank you,
