

J.W. WINCO, INC. LEVELING SETS OFFER PRECISE LEVELING AND LOCKING

NEW BERLIN, WI -- J.W. Winco, Inc., a leading supplier of standard industrial machine components, announced it now offers GN 350.5 and GN 350.5-NI Steel and Stainless Steel Leveling Sets, with Spherical Washer, with Locknut, in metric sizes.

These RoHS-compliant leveling sets are used for leveling, adjusting, and linking operations. GN 350.5 versions are made of zinc plated, blue passivated steel, 1.7225 (42 CrMo 4 V), and GN 350.5-NI versions are stainless steel, European Standard No. 1.4305 (American Standard Series 303).

Leveling sets consist of a threaded upper sleeve and a tapped lower sleeve. The fine thread allows precise, stepless setting and locking using a DIN 1810A hook wrench. An anti-rotation disk serves also as a height limiter for the maximum height. The spherical washer allows precise installation of two non-parallel planes at a required gradient up to $\sim 4^\circ$.

J.W. Winco offers an extensive selection of inch and metric size adjustable levers, cabinet U-handles, plastic and steel hinges and locking mechanisms, revolving and retractable handles, hand wheels, hand cranks, tube connection and conveyor components, inch and metric construction tubing, shock absorption mounts, leveling mounts, hand knobs, spring, ball and indexing plungers, jig, fixture and fastening components, retaining magnet assemblies, toggle clamps, metric casters and wheels, universal joints, oil sight glasses, and metric tools for the industrial and commercial equipment industries. J.W. Winco's website catalog, with 3D CAD and online buying, is viewable at www.jwwinco.com.

For more information, contact J.W. Winco at 800-877-8351, by fax at 800-472-0670, on the Web at www.jwwinco.com, and via e-mail at sales@jwwinco.com.
