Construction Trends: Short & Longterm Outlook

Join ITR Economist Connor Lokar for this [construction industry-specific webinar](#). Connor will focus on Residential and Nonresidential Construction trends in the U.S.

Topics will include:

- **Residential Trends:** Single and Multi-Family Housing Starts outlooks as well as supporting leading indicator analysis
- **Nonresidential Trends:** Analysis and outlooks on commercial, institutional, industrial, and energy construction segments
- A snapshot of various **critical commodity prices trends** and directions

Webinar attendees will come away with a deeper understanding of where individual segments in construction will be headed over the next three years and how that will impact their business.
