

J.W. WINCO, INC. RETAINING MAGNET ASSEMBLIES HAVE TAPPED HOLE

NEW BERLIN, WI – June 12, 2015 - J.W. Winco, Inc., a leading supplier of standard industrial machine components, announced it now offers GN 50.5 Retaining Magnet Assemblies, Disk-Shaped, with Tapped Hole, in metric sizes.

These RoHS-compliant magnets are a shielded magnetic assembly. To ensure that the magnetic forces are not impaired, the mounting screws must be made of non-magnetic material. For magnets with d1 diameter ≤ 40 mm, the magnet surface is exposed. For d1 diameters ≥ 50 mm, the magnetic surface of the magnet is covered with a plastic cap.

The magnet housing is zinc plated steel. The magnet is Neodymium, iron, and boron NdFeB (ND type). The cover cap is technopolymer plastic (Polyamide PA). Assemblies are temperature resistant to 175°F (80°C).

J.W. Winco offers an extensive selection of inch and metric size adjustable levers, cabinet U-handles, plastic and steel hinges and locking mechanisms, revolving and retractable handles, hand wheels, hand cranks, tube connection and conveyor components, inch and metric construction tubing, shock absorption mounts, leveling mounts, hand knobs, spring, ball and indexing plungers, jig, fixture and fastening components, retaining magnet assemblies, toggle clamps, metric casters and wheels, universal joints, oil sight glasses, and metric tools for the industrial and commercial equipment industries. J.W. Winco's website catalog, with 3D CAD and online buying, is viewable at

www.jwwinco.com.
