

J.W. Winco, Inc. Stainless Steel Connector Clamps Resist Moisture Build-Up

J.W. Winco, Inc., a leading supplier of standard industrial machine components, announced it now offers GN 132.5 Stainless Steel Two-Way Connector Clamps, in metric sizes.

These RoHS-compliant connector clamps have clamping bores machined and are designed for GN 990 construction tubings or DIN 2391, DIN 2395, and DIN 2462 tubes respectively. Clamps and hardware are all made of A2 stainless steel. Type A features without sealing, while Type B features sealing with plastic washers (Polyacetal POM) and an edge ring of Silicon, 40-60 Shore A.

The shape of the clamping screws/nuts prevents the formation of moisture build-up. The Type B version also seals the mounting hardware bore holes and threads. The material and design of these connector clamps make them ideal for hygienic applications.

J.W. Winco offers an extensive selection of inch and metric size adjustable levers, cabinet U-handles, plastic and steel hinges and locking mechanisms, revolving and retractable handles, hand wheels, hand cranks, tube connection and conveyor components, inch and metric construction tubing, shock absorption mounts, leveling mounts, hand knobs, spring, ball and indexing plungers, jig, fixture and fastening components, retaining magnet assemblies, toggle clamps, metric casters and wheels, universal joints, oil sight glasses, and metric tools for the industrial and commercial equipment industries. J.W. Winco's website catalog, with 3D CAD and online buying, is viewable at www.jwwinco.com.
