

J.W. Winco, Inc. Cover Caps Work with Angle Brackets for Profile Systems

J.W. Winco, Inc., a leading supplier of standard industrial machine components, announced it now offers metric size GN 963 Cover Caps for GN 960 and 961 metric size Angle Brackets.

These RoHS-compliant cover caps are suitable for use with GN 960 and GN 961 angle brackets for aluminum T-slot profile systems. After the angle brackets are assembled, the cover caps are snapped into place via four lugs. They give the angle bracket a finished appearance and protect against dirt. Even after repeated use, cover caps will remain firmly in place inside the angle brackets, thanks to the elastic snap-type lugs.

Cover caps are matte black Polyamide PA plastic and are available in three sizes.

J.W. Winco offers an extensive selection of inch and metric size adjustable levers, cabinet U-handles, plastic and steel hinges and locking mechanisms, revolving and retractable handles, hand wheels, hand cranks, tube connection and conveyor components, inch and metric construction tubing, shock absorption mounts, leveling mounts, hand knobs, spring, ball and indexing plungers, jig, fixture and fastening components, retaining magnet assemblies, toggle clamps, metric casters and wheels, universal joints, oil sight glasses, and metric tools for the industrial and commercial equipment industries. J.W. Winco's website catalog, with 3D CAD and online buying, is viewable at www.jwwinco.com.
