

J.W. Winco, Inc. Long Hex Key Sets with Ball End are Color Coded

J.W. Winco, Inc., a leading supplier of standard industrial machine components, announced it now offers No. 911LG-H100F Long Arm Hexagon Key Sets with Ball End (100 Degree Angle), in inch sizes.

These RoHS-compliant hex keys feature color-coding that enables them to be found faster and reduces mix-up. 100° bend provides better screw access through reduced length of the short shank, and allows for secure working even in narrow spaces.

Hex keys are Chrome-Vanadium steel, hardened, chromium plated, and color-coded with electrostatically-applied powder coating. Set includes 13 pieces with SW = .05-3/8". The company also offers metric size long arm hexagon key sets with 100° angle.

J.W. Winco offers an extensive selection of inch and metric size adjustable levers, cabinet U-handles, plastic and steel hinges and locking mechanisms, revolving and retractable handles, hand wheels, hand cranks, tube connection and conveyor components, inch and metric construction tubing, shock absorption mounts, leveling mounts, hand knobs, spring, ball and indexing plungers, jig, fixture and fastening components, retaining magnet assemblies, toggle clamps, metric casters and wheels, universal joints, oil sight glasses, and metric tools for the industrial and commercial equipment industries. J.W. Winco's website catalog, with 3D CAD and online buying, is viewable at www.jwwinco.com.
