

Latches with Gripping Tray Offered by J.W. Winco, Inc.

J.W. Winco, Inc., a leading supplier of standard industrial machine components, announced it now offers GN 115.10 Latches with Gripping Tray, Lockable, in metric sizes.

These RoHS-compliant latches with gripping tray are used in applications that require a molded recess in addition to the latching mechanism, e.g. if operating elements are not allowed to protrude for reasons of space. A rotary movement (limited to 90°) of the three-edged wedge moves the latch behind the frame, with the run-up bevels at the latch making it easier to close the door.

The front frame is zinc die-cast with either black plastic coated textured finish or silver textured finish. The tray is plastic, either gray or light gray. Latch housing is zinc die-cast, black plastic coated finish or chrome plated finish. Latch hardware is zinc-plated, blue passivated steel. Five types are offered: with triangular spindle, square spindle A/F 7 mm, square spindle A/F 8 mm, slot, or double bit. Twenty-two different latch arms cover the latch distance in a range from 4 to 50 mm.

J.W. Winco offers an extensive selection of inch and metric size adjustable levers, cabinet U-handles, plastic and steel hinges and locking mechanisms, revolving and retractable handles, hand wheels, hand cranks, tube connection and conveyor components, inch and metric construction tubing, shock absorption mounts, leveling mounts, hand knobs, spring, ball and indexing plungers, jig, fixture and fastening components, retaining magnet assemblies, toggle clamps, metric casters and wheels, universal joints, oil sight glasses, and metric tools for the industrial and commercial equipment industries. J.W. Winco's website catalog, with 3D CAD and online buying, is viewable at www.jwwinco.com.
