

J.W. Winco, Inc. GN 252.5 Threaded Plugs Perform Spring Retention

J.W. Winco, Inc., a leading supplier of standard industrial machine components, announced it now offers GN 252.5 Stainless Steel Threaded Plugs in metric sizes.

These RoHS-compliant threaded plugs can be used as spring retention units or as plugs to keep debris from entering into critical threaded areas. The PRB thread coating (polyamide allround coating) acts as a clamping lock, preventing the locking screw from inadvertently being loosened and becoming detached.

Plugs are made of stainless steel, European Standard No. 1.4305 (American Standard Series 303). They are available with or without thread coating (polyamide overall thread coating). Thread sizes range from M12 to M27.

J.W. Winco offers an extensive selection of inch and metric size adjustable levers, cabinet U-handles, plastic and steel hinges and locking mechanisms, revolving and retractable handles, hand wheels, hand cranks, tube connection and conveyor components, inch and metric construction tubing, shock absorption mounts, leveling mounts, hand knobs, spring, ball and indexing plungers, jig, fixture and fastening components, retaining magnet assemblies, toggle clamps, metric casters and wheels, universal joints, oil sight glasses, and metric tools for the industrial and commercial equipment industries. J.W. Winco's website catalog, with 3D CAD and online buying, is viewable at www.jwwinco.com.
