

MACDERMID OPENS NEW MEXICAN FACILITY

MacDermid has recently opened a location in Tlalnepantla de Baz in Mexico State. The 21,000 sq ft facility includes a state-of-the-art laboratory capable of performing tests such as Atomic Absorption, HPLC, etc. Lab personnel have been fully trained in all areas of analytical testing in order to meet customer requirements.

MacDermid is a global producer of high technology specialty chemical products and provider of technical service. Our specialty chemicals are a key component of the manufacturing supply chain for the aerospace, medical device, printed circuits, and transportation industries (automotive, motorcycle, heavy truck and agricultural).
