

## New Tapered Section Retaining Ring (Circlip) Series Released

When you are in need of a quick and economical heavy-duty ring, Smalley's newest standard series of Tapered Section Retaining Rings (Circlips) is here to secure your assembly!

With over 100 years of manufacturing excellence, Smalley is the Engineer's Choice® for supplying or designing the right retaining ring solution for all of your application needs.

Smalley has recently partnered with Beneri, the leading Italian circlip manufacturer since 1958, to bring you even more retaining ring solutions at the same quality you trust.

*What are Tapered Section Retaining Rings (Circlips)?*

Tapered Section Retaining Rings, also referred to as circlips, are retaining rings with a tapered radial wall.

Designed for high thrust loads and heavy-duty applications, Tapered Section Retaining Rings are trusted in thousands of applications across every industry because they are an economical, efficient, and secure method to streamline your assembly.

“We are excited to introduce Tapered Section Retaining Rings to our selection of over 6,000 retaining rings,” said Jon Fulton, Director of Sales Engineering. “Expanding our retaining ring product line will help us better support our customers and their unique application requirements.”

Internal and External Tapered Section Retaining Rings are in stock from 0.25 – 3”, or 3 – 75 mm.
