**news release**

CLIENT: MICRO PLASTICS, INC.

PRODUCT: 4ZERO CABLE TIES  
FOR IMMEDIATE RELEASE:

Micro Plastics, Inc. introduces a new product line of **4ZERO Cable Ties**, designed to offer a superior performance in extreme environment conditions. With tensile strengths up to 200 lbs, **4ZERO Cable Ties** offer a strong and secure hold.

The 4ZERO Cuff is the most advanced flexible polymer handcuff on the market and is used by select police and law enforcement agencies that demand the strongest and most durable product available. Now, the same material used to manufacture the 4ZERO Cuff is available in a line of extremely durable cable ties designed to perform and hold their strength in extremely dry environments and in temperature extremes from 30 degrees below to over 400 degrees Fahrenheit - conditions that can leave normal nylon cable ties brittle and broken.

Available sizes of **4ZERO Cable Ties**

8" - 50 LB  
14 1/2" - 50 LB  
11" - 120 LB  
22" - 200 LB

Micro Plastics' manufactures millions upon millions of fasteners daily. They offer over 20,000 items and maintain an inventory of over 250 million parts.

See their full line catalog #40 for a complete list of nylon fasteners that are available. FREE samples are available upon request. Contents include: standard and metric machine screws, cap screws, nuts, washers, spacers, insulators, grommets, bushings, rivets, hole plugs, clamps, printed circuit board accessories, suspended ceiling hooks, wire routing kits and many other hardware items.
