

autoPEM™ Fasteners!

Product Announcement from PennEngineering

PennEngineering Automotive employs a unique manufacturing and distribution methodology based on manufacturing of high strength fasteners in Penn's wholly owned manufacturing subsidiaries in mainland China, supported by sales, product inventory, distribution services and customer technical assistance strategically located in close proximity to its global customers.

PennEngineering is one of the first company's in the world to develop the ability to manufacture high strength fasteners in China that meet today's demanding global automotive quality standards. Both of PennEngineering's state-of-the-art manufacturing facilities in China have been certified to meet ISO/TS 16949, the global automotive standard for quality systems.

Utilizing the advantages of low cost China manufacturing, Penn is uniquely positioned to provide reduced product cost at the same or better quality level, as compared to its Western competitors who are

locked in to high manufacturing & distribution cost structures. Penn's local service centers provide its customers with close personalized service as well as assurance of continuity of supply of product from its China operation.
